PREFACE

This publication presents a range of social and housing statistics produced from the 1996 Census of Population and Housing for Australia, its States and Territories and their regions. Together with census population counts, it includes tables of selected census data which describe the characteristics of people living in each area and their housing arrangements. Similar publications are available for each State and Territory.

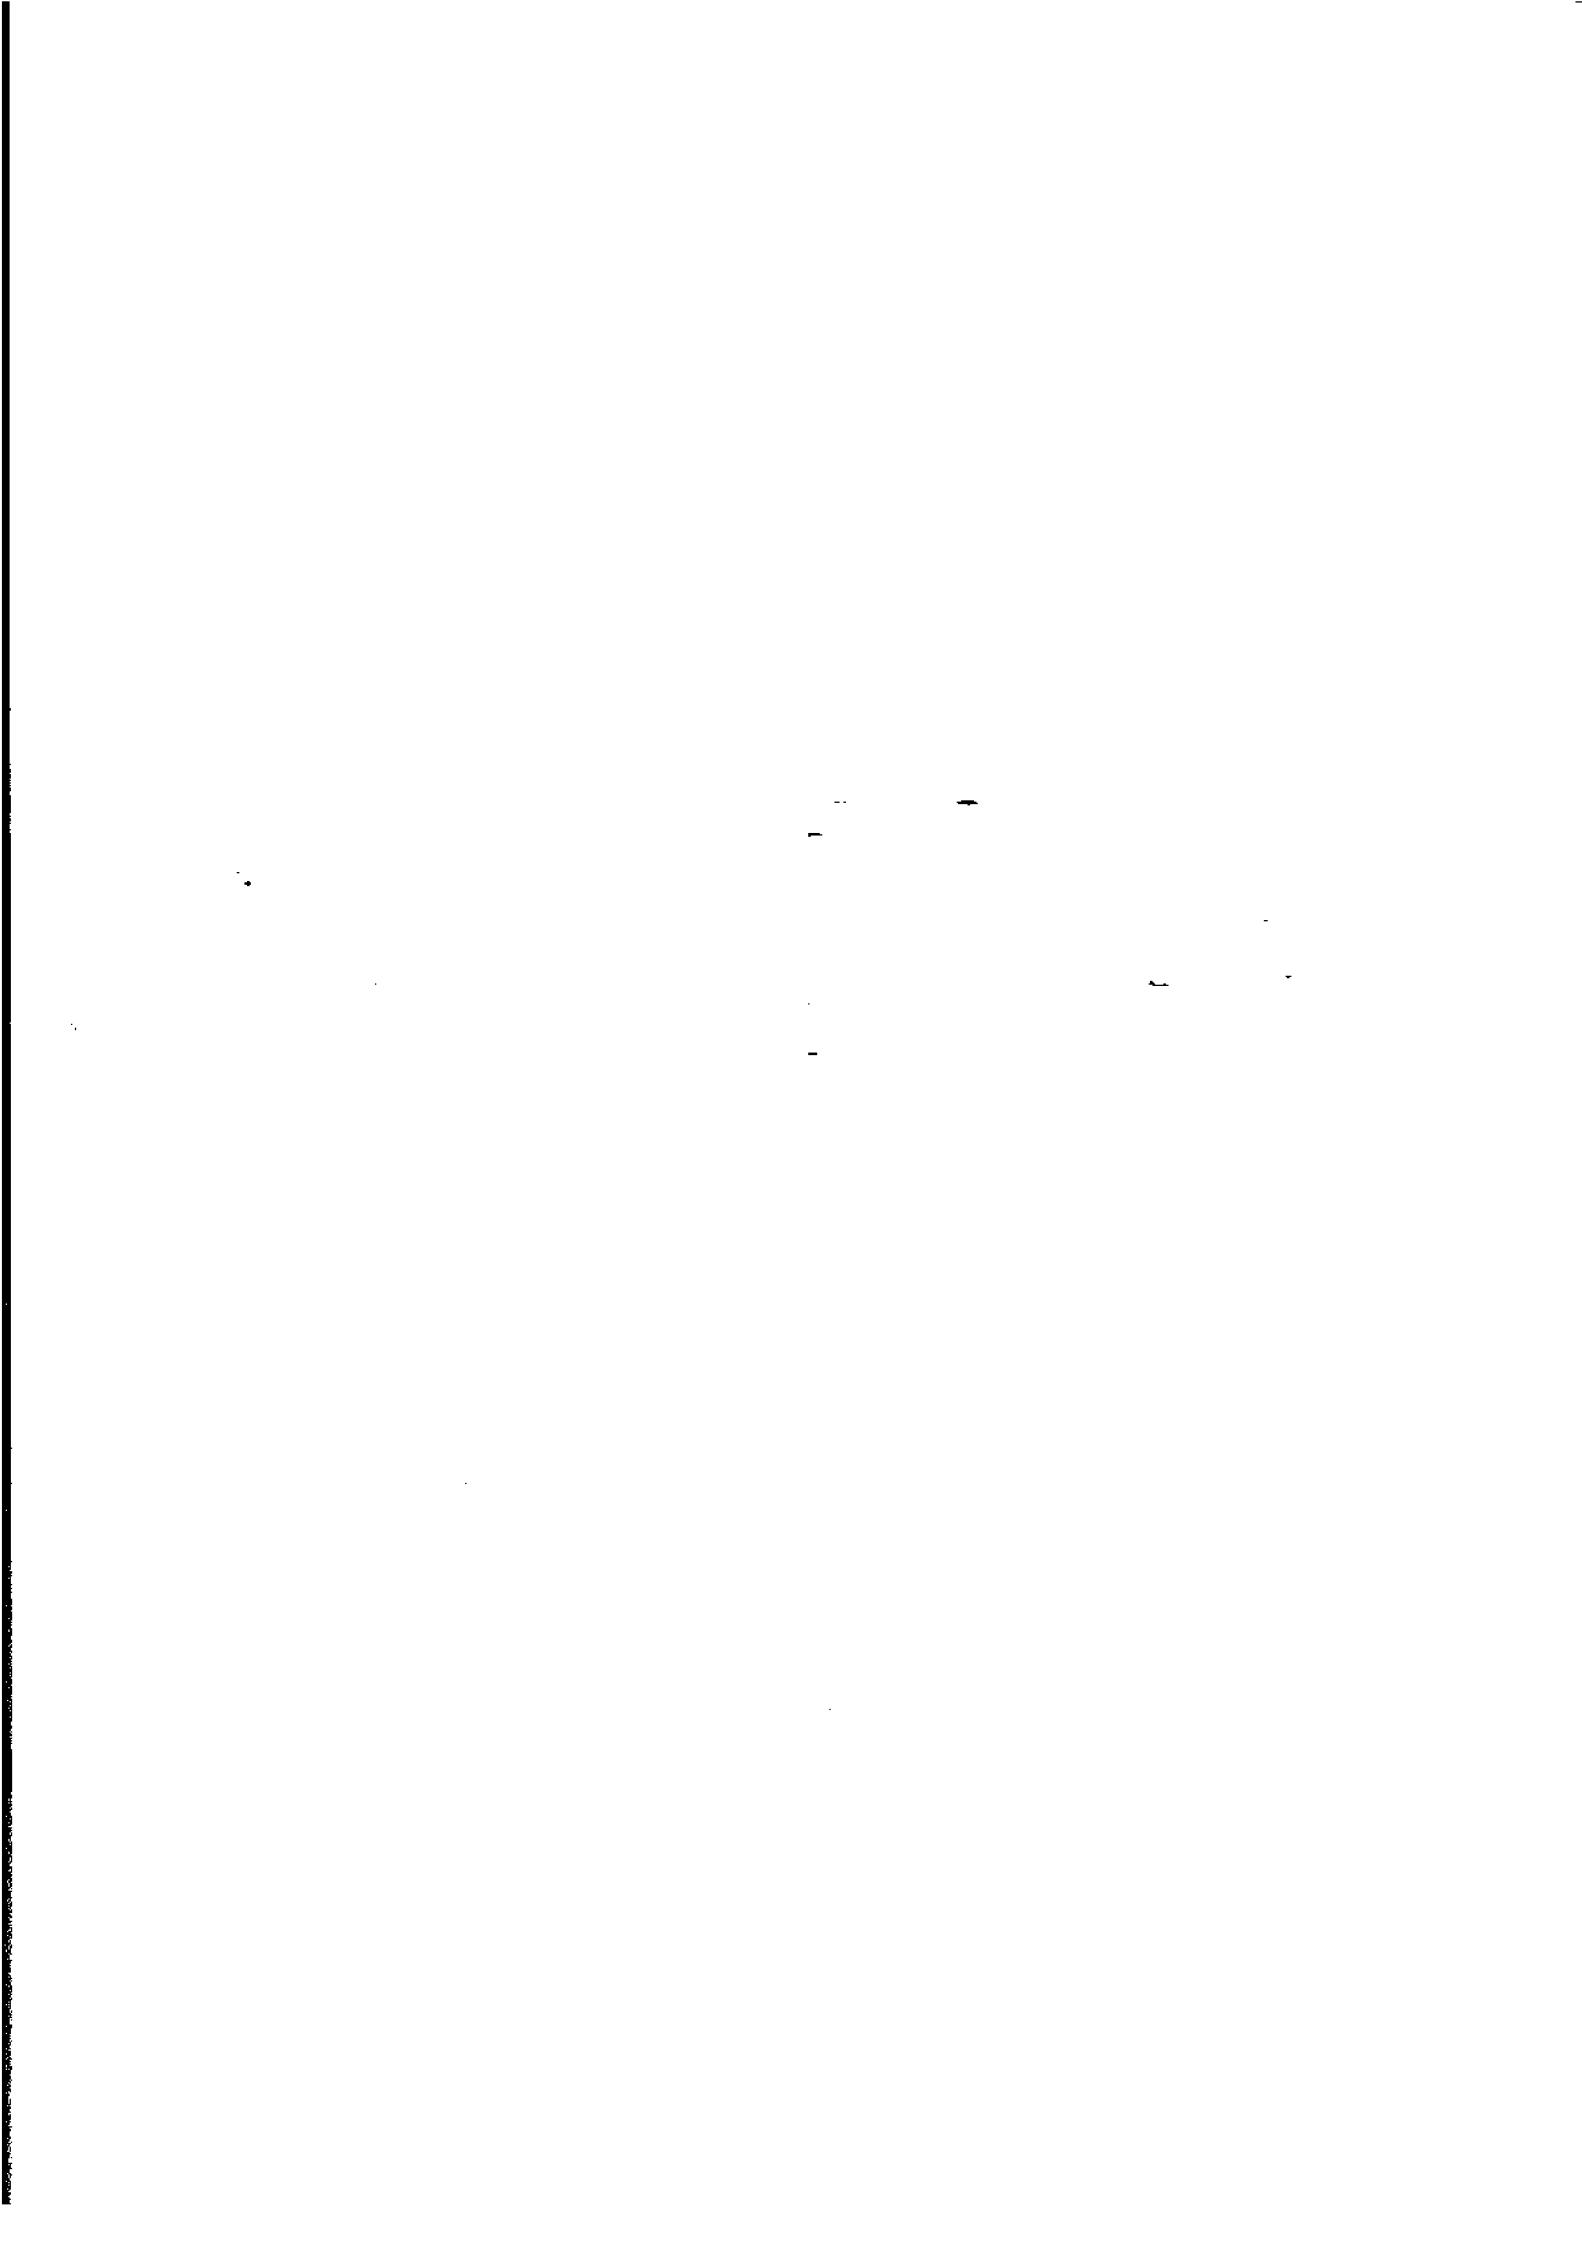

Detailed characteristics from the 1996 Census are being released in two stages. The first release consists of demographic, social and housing data. The second release, comprising family and labour force related data, will be provided progressively State by State from August 1997.

The data presented in this publication relate to where people were enumerated on census night. They should not be confused with the official estimated resident population (ERP) figures, which are derived by including in the census usual residence counts, the following:

- estimates of Australians overseas;
- an adjustment for estimated underenumeration; and
- adjustments for births, deaths and migration, between 30 June and 6 August 1996.

Census data presented in this publication represent only a selection of the full range of statistics that could be derived from the census. For further information about other census or ABS data refer to the *Appendix — Census Products and Services*, or the *Directory of Census Statistics* (Cat. no. 2910.0). Concepts and definitions used in this publication are explained in the *Glossary* and more detailed information is available in the *Census Dictionary* (Cat. no. 2901.0).

W. McLennan
Australian Statistician

SUMMARY OF FINDINGS

AUSTRALIAN OVERVIEW

The 1996 Census of Population and Housing counted 17,892,423 people in Australia on census night, 94.6% of whom were counted at home. This represents a growth of 6.2% (1,040,165 people) in Australia's population count since 1991 (16,852,258).

The number of people counted in occupied private dwellings increased by 6.2% since the 1991 Census, from 16,261,839 to 17,267,825. Over the same period, however, the average number of people per occupied private dwelling declined, from an occupancy rate of 2.8 to 2.7 people per dwelling.

AGE

Australia's population is ageing, with a median age of 34 years in 1996 compared to 32 years in 1991. Just over one-fifth (21.6%) of Australia's population (excluding overseas visitors) in 1996 were aged 0–14 years, 14.5% were aged 15–24 years, 30.8% were aged 25–44 years, 21.0% were aged 45–64 years and 12.1% were aged 65 years and over.

BIRTHPLACE

The majority (73.9%) of people counted in Australia were Australian-born. Of those people born overseas, over one-third (36.2%) were from the United Kingdom, Ireland or New Zealand. For the remaining overseas-born people, the highest numbers were born in Italy, Viet Nam, Greece, China and Germany.

INDIGENOUS ORIGIN

The number of people who identified as being of Indigenous origin increased by 33.0% between 1991 and 1996, from 265,458 to 352,970. This represents an increase from 1.6% to 2.0% of the total Australian population. This increase is partly explained by people's increased willingness to declare their Indigenous origin.

EDUCATION

In 1996, 6.0% of people in Australia were engaged in full or part-time study in Technical or Further Institutions, university or other tertiary institutions.

INCOME

The median weekly personal income for people aged 15 years and over in 1996 was \$292 (approximately \$15,184 p.a.). The corresponding median for 1991 was \$268 (\$13,936 p.a.).

DWELLINGS

About two-fifths (40.9%) of the occupied private dwellings counted in Australia were owned by their occupants, 25.5% were being purchased and 28.7% were rented. These levels were similar to those of 1991.

SUMMARY OF FINDINGS *continued*

REGIONAL OVERVIEW

SEX

More females than males were counted in Australia on census night (50.5% and 49.5% of the total Australian population respectively). Females outnumbered males in most States and Territories, with Victoria, South Australia and Tasmania recording the highest proportions (50.8% in each case). The Australian Capital Territory and New South Wales each recorded 50.6% females, Queensland recorded 50.3% and there were about equal numbers of males and females in Western Australia (50.0%). In the Northern Territory the situation was reversed with more males (52.0%) than females counted.

Similarly, females outnumbered males in all Capital City Statistical Divisions (SDs), with the exception of Darwin SD, where males accounted for 51.7% of the total population.

AGE

Reflecting the ageing of Australia's population, all States and Territories recorded increases since 1991 in their median ages of between one and two years. The highest median age was recorded in South Australia (35 years), while the Northern Territory (29 years) had the lowest median age.

The age profiles of the States and Territories, as indicated by the proportion of people aged 65 years and over, largely reflected these variations in the median age. South Australia had the highest percentage of people aged 65 years and over (13.8%) and the Northern Territory (4.9%) had the lowest. While Victoria, Queensland and Western Australia all had the same median age (33 years), the proportion of people aged 65 years and over was higher in Victoria and Queensland (both 12.0%) than in Western Australia (10.5%).

Of the Capital City SDs, only Adelaide and Greater Hobart recorded both median ages (35 and 34 years respectively) and percentages of people aged over 65 years (14.1% and 12.5% respectively) above the national figures (34 years and 12.1%). In contrast, Darwin and Canberra recorded both the lowest median ages (both 30 years) and percentages of people aged over 65 years (5.0% and 7.1% respectively).

BIRTHPLACE

Australian-born

Although the majority of people counted in all States and Territories were born in Australia, the proportion of Australian-born varied across the country. Tasmania had the highest proportion of people who were born in Australia (85.9%), while the lowest percentage was recorded in Western Australia (68.3%).

Overseas-born

Over three-quarters (76.4%) of all overseas-born people were counted in three States (New South Wales, Victoria and Queensland) and over half (52.8%) were located in two Capital City SDs (Sydney and Melbourne).

The proportions and composition of the overseas-born population varied considerably among the States and Territories. The highest percentages of people born overseas, as

SUMMARY OF FINDINGS *continued*

Overseas-born continued

a proportion of the total State/Territory populations, were recorded in Western Australia (27.6%) and Victoria (23.8%), while the lowest levels were registered in Tasmania (10.2%) and the Northern Territory (15.1%).

Over half of the overseas-born people counted in Tasmania (57.1%), Western Australia (53.3%) and Queensland (52.3%) were from the United Kingdom, Ireland and New Zealand. Conversely, high proportions of people born in countries other than these were counted in Victoria (74.1%) and New South Wales (71.6%).

Amongst the Capital City SDs, high proportions of overseas-born people were in Perth (32.3%), Sydney (30.7%) and Melbourne (29.2%). These cities have typically been the initial settlement locations for immigrants. While people born in the United Kingdom, Ireland and New Zealand made up just over half (50.8%) of the overseas-born population in Perth, over three-quarters of the overseas-born population in Melbourne (76.9%) and Sydney (75.9%) were born elsewhere.

SPEAKS ANOTHER LANGUAGE AT HOME

People, aged five years and over, who reported speaking a language other than English at home were predominantly counted in New South Wales (1,015,862 people) and Victoria (816,558). Both these States had high proportions of overseas-born people who were born in countries other than the United Kingdom, Ireland and New Zealand.

As a proportion of the total population aged five years and over, however, the Northern Territory (22.5%) recorded the highest percentage of people speaking a language other than English. In the Northern Territory, the majority (70.9%) of people speaking a language other than English at home spoke an Australian Indigenous language.

Of the Capital City SDs, Sydney (26.2%) and Melbourne (26.0%) recorded the highest proportions of people who reported speaking a language other than English at home. The lowest figures were recorded for Greater Hobart (4.9%) and Brisbane (9.2%).

INDIGENOUS ORIGIN

Over half (55.8%) of Australia's Indigenous people were counted in two States: New South Wales (101,485) and Queensland (95,518). A further 14.4% and 13.1% were counted in Western Australia (50,793) and the Northern Territory (46,277) respectively. However, Indigenous people represented only 3% or less of the total population in each State and Territory, except in the Northern Territory where the figure stood at 23.7%.

The increase since 1991 in the numbers of people reporting to be of Indigenous origin was not uniformly distributed across Australia. The Australian Capital Territory and Tasmania recorded the highest rates of increase (increasing by 82.0% and 56.1% respectively), while the Northern Territory (16.0%) recorded the lowest rate. Amongst the Capital City SDs, the highest rates of increase were recorded in Canberra (82.4%) and Brisbane (64.3%), while the lowest rate was recorded in Darwin (19.2%).

Of the Capital City SDs, Darwin had the highest proportion of people reporting to be of Indigenous origin (8.6%), followed by Greater Hobart (2.5%).

SUMMARY OF FINDINGS *continued*

INCOME

At the State and Territory level, the highest median weekly personal income levels were recorded in the Australian Capital Territory (\$430) and the Northern Territory (\$358), both well above the Australian average of \$292. The States reporting the lowest median incomes were Tasmania (\$257) and South Australia (\$267).

Reflecting the State and Territory median income levels, Canberra (\$430) and Darwin (\$426) recorded the highest median incomes, while the lowest median income levels were reported in Adelaide (\$273) and Greater Hobart (\$283).

TENURE TYPE

Levels of home ownership varied widely across Australia. The highest home ownership rates were recorded in Victoria (43.7%), New South Wales (42.5%) and Tasmania (42.4%), while the lowest was recorded in the Northern Territory (17.8%). Despite reporting the lowest rate, the level of home ownership in the Northern Territory increased 38.2% since 1991, representing the largest increase of any State or Territory.

Of the Capital City SDs, the highest proportions of home ownership were recorded in Melbourne (42.6%) and Sydney (40.6%).

The Australian Capital Territory and Western Australia recorded the highest proportions of dwellings being purchased (34.5% and 29.8% respectively). However, Queensland (22.5%) and the Northern Territory (18.0%) recorded the largest increases since 1991 in the numbers of dwellings being purchased.

Canberra (34.5%) and Perth (32.0%) reported the highest proportions of dwellings being purchased, while the lowest was recorded in Sydney (23.2%). Between 1991 and 1996, the level of dwellings being purchased in Sydney and Melbourne decreased by 4.6% and 0.9% respectively, corresponding with higher levels of home ownership.

With comparatively low levels of home ownership and dwellings being purchased, the Northern Territory contained the highest proportion (48.0%) of dwellings being rented.

RENT PAYMENTS

The median rent payment for Australia increased by 12.7% since the 1991 Census, from \$109 to \$123 per week in 1996.

There were significant variations in rent payments across Australia. At the State and Territory level, the highest median rent payments per week were recorded in the Australian Capital Territory (\$150) and New South Wales (\$140), while the lowest amounts were paid in Tasmania and South Australia (\$90 each).

Median rent payments for dwellings in Capital City SDs (other than Canberra) were higher than those for the total State or Territory. The highest rental payments were recorded in Sydney (\$165) and Canberra (\$150) and the lowest in Greater Hobart (\$100).

SUMMARY OF FINDINGS *continued*

HOUSING LOAN REPAYMENTS

The median monthly housing loan repayment for Australia rose from \$561 in 1991 to \$780 in 1996, an increase of 39.0%.

Median housing loan repayments ranged from \$585 in Tasmania to \$923 in the Australian Capital Territory. Of the Capital City SDs, Sydney recorded the highest median housing loan repayment of \$1,000. As with median rental payments, housing loan repayments were higher in Capital City SDs compared with the respective State or Territory medians.

EXPLANATORY NOTES

SCOPE AND COVERAGE

- 1** The 1996 Census of Population and Housing was held on 6 August 1996. The first census was held in 1911 and since 1961 a census has been taken every five years, a frequency which is specified in the *Census and Statistics Act 1905*. The objective of the census is to measure accurately the number and key characteristics of people in Australia on census night, and the dwellings in which they live.
- 2** The census aims to count every person who spent census night in Australia. This includes Australian residents in Antarctica and people in the territories of Jervis Bay, Cocos (Keeling) Islands and Christmas Island. The other Australian External Territories, Norfolk Island and minor islands such as Heard and McDonald Islands, are outside the scope of the Australian Census. The only group of people who spend census night in Australia but are excluded from the census are foreign diplomats and their families.
- 3** The census includes people on vessels in or between Australian ports, on board long distance trains, buses or aircraft and on oil or gas rigs off the Australian coast. People entering Australia before midnight on census night are counted while people leaving an Australian port for an overseas destination before midnight on census night are not. Visitors to Australia are included regardless of how long they have been in the country or how long they plan to stay. However, for people who intend to be in Australia less than six months only basic demographic data are available. The census includes people camping out and the homeless.
- 4** All private dwellings, except diplomatic dwellings, are included in the census, whether occupied or unoccupied. Caravans in caravan parks, manufactured homes in manufactured home estates and self-care units in accommodation for the retired or aged are counted only if occupied. Occupied non-private dwellings, such as hospitals, prisons, hotels, etc. are also included.
- 5** Details about the 1996 Census content, collection operations, confidentiality and privacy protection, processing and evaluation activities are contained in *1996 Census of Population and Housing: Nature and Content of the Census* (Cat. no. 2008.0).

BASIC COMMUNITY PROFILE TABLES B01 TO B16

- 6** Tables numbered B01 to B16 contained in this publication are from the 1996 Census Basic Community Profile (Cat. nos. 2020.0-8). These tables are available in hardcopy or electronic format for all standard census geographic areas. For more information about the Community Profiles please refer to the Appendix.

ABS POPULATION ESTIMATES

- 7** This publication contains population counts based on where people were counted on census night, which may not have been where they usually lived. The census can provide person counts based on place of usual residence at the geographic level of Statistical Local Area (SLA).
- 8** Official ABS population estimates (estimated resident population) are also separately available from the ABS. The estimates are based on census counts that have been adjusted to:
 - include people who were in Australia on census night but were missed in the census;
 - include Australian residents who were temporarily overseas on census night (these people were not within scope of the census); and
 - exclude overseas visitors counted in the census who were not usual residents of Australia.
- 9** The adjusted census count is then updated quarterly using demographic statistics. These are statistics on births, deaths, and overseas and internal migration.

EXPLANATORY NOTES *continued*

ABS POPULATION ESTIMATES *continued*

10 ABS population estimates are published in *Australian Demographic Statistics* (Cat. no. 3101.0), produced quarterly, and in *Estimated Resident Population by Sex and Age: States and Territories of Australia* (Cat. no. 3201.0) produced annually.

11 The ABS also provides projections (based on different assumptions as to future fertility, mortality and migration) of the resident population of Australia, States and Territories. These projections are published biennially in *Projections of the Populations of Australia, States and Territories* (Cat. no. 3222.0).

DATA LIMITATIONS

12 Census data are subject to a number of inaccuracies resulting from errors by respondents or mistakes in collection or processing. Whilst many of these are corrected by careful processing procedures, some still remain. The effect of the remaining errors is generally slight, although it may be more important for small groups in the population. The main kinds of error to keep in mind are:

- *Partial non-response*: In some cases where an answer is not provided to a question an answer is imputed (often from other information on the form). In other cases a 'not stated' code is allocated.
- *Processing error*: While such errors can occur in any processing system, quality management is used continuously to improve the quality of processed data, and to identify and correct data of unacceptable quality.
- *Random adjustment*: Table cells containing small values are randomly adjusted or suppressed to avoid releasing information about particular individuals, families, or households. The effects of these adjustments are statistically insignificant.
- *Respondent error*: Because processing procedures cannot detect or repair all errors made by people in completing the forms, some remain in final data.
- *Undercount*: Although the census aims to count each person, there are some people who are missed and others are counted more than once. The data in this publication are not adjusted for the net undercount.

13 Further information on data quality is provided progressively in *Census Update* and in *1996 Census Data Quality Working Papers*.

OVERSEAS VISITORS

14 Data for overseas visitors (who intend to be in Australia for less than six months) are restricted to age, sex and marital status. In this publication overseas visitors contribute only to the male, female and total person counts.

CALCULATIONS OF PROPORTIONS

15 When calculating the proportion of the population with a particular characteristic, overseas visitors and 'Not stated' responses are included in the denominator. For example, in the Summary of Findings, the *Proportion of Australian-born* was calculated by dividing the number of persons who stated that they were Australian-born by the total population (including overseas visitors and those who did not report their birthplace) and expressing the result as a percentage.

CALCULATION OF MEDIANS

16 A median is a measure of central tendency. It is a mid value which divides a population distribution into two, with half the observations falling below it and half above it. Unlike averages (means) medians are not usually skewed by extreme observations.

EXPLANATORY NOTES *continued*

CALCULATION OF MEDIAN *continued*

17 There are a number of issues to be aware of:

- The categories 'Not stated', 'Overseas visitor', and 'Not applicable' are not included in the calculation of medians.
- If a median falls into a category that has a text only label then the median is set to 0. For this publication this is only relevant to the calculation of median personal income, as the income classification includes categories 'Nil income' and 'Negative income'.
- If the median is calculated on a classification containing ranges and a range is open-ended and the median falls within that category, the median is set to the number in the label. For example, in the calculation of median personal income, if the median falls in the last range '\$1,500 or more', \$1,500 is allocated as the median.

UNADJUSTED DOLLARS

18 The 1991 Census dollar values for Median Personal Income, Median Housing Loan Repayments and Median Rent Paid have not been adjusted into 1996 dollars.

SYMBOLS AND OTHER USAGES

19 The following abbreviations and symbols are used in this publication:

General abbreviations and symbols

Mthly	Monthly
Wkly	Weekly

APPENDIX — CENSUS PRODUCTS AND SERVICES

There is a wide range of products and services developed from the 1996 Census of Population and Housing, details of which are listed in brief below. For more detailed information on the 1996 Census range of products and services, please refer to the *1996 Census of Population and Housing, Directory of Census Statistics* (Cat. no. 2910.0), or call our Client Services Officers in your State or Territory (refer to the telephone numbers listed on the back page of this publication).

CENSUS REFERENCE PRODUCTS

Census Dictionary

The *Census Dictionary* (Cat. no. 2901.0) is a comprehensive reference guide to the concepts and terms used in the 1996 Census of Population and Housing. It includes a complete listing of the 1996 Census classifications and a glossary of census terms.

How Australia Takes a Census

How Australia Takes a Census (Cat. no. 2903.0) provides information about the history of the census, the planning process and the way in which the census is conducted.

Geographic Classifications and Codes

Statistical Geography: Volume 1 Australian Standard Geographical Classification (ASGC) (Cat. no. 1216.0) provides information about the names and codes of the geographic areas used in the 1996 Census.

1996 Census Statistical Local Area Maps

These reference maps show the Statistical Local Areas (SLAs) from the 1996 Census. Each map shows the boundary of an SLA and the CD boundaries contained within.

Digital Boundaries

All of the census boundaries are available electronically in industry formats through a range of secondary providers.

CENSUS DATA PRODUCTS

Estimated Resident Population (ERP)

The ERP is the official population figure and is based on adjusting the results of the census to provide more accurately the numbers of people usually living in an area.

Two publications containing ERP data, based on 1996 Census figures are:

- *Australian Demographic Statistics — 1996 Census Edition* (Cat. no. 3101.0); and
- *Regional Population Growth, Australia — 1996 Census Edition* (Cat. no. 3218.0).

Selected Characteristics

This series of publications contains data and commentary on various person and dwelling characteristics from the 1996 Census at selected geographic levels. There are three publications in the series:

- *Census of Population and Housing: Selected Social and Housing Characteristics for Statistical Local Areas* (Cat. nos. 2015.0-8);
- *Census of Population and Housing: Selected Social and Housing Characteristics for Urban Centres and Localities* (Cat. nos. 2016.0-8), (indicative release date: January 1998); and

APPENDIX — CENSUS PRODUCTS AND SERVICES *continued*

Selected Characteristics *continued*

- *Census of Population and Housing: Selected Family and Labour Force Characteristics for Statistical Local Areas* (Cat. nos. 2017.0-8), (indicative release date: March 1998).

Community Profile Series

The *Community Profile Series* (Cat. nos. 2020.0-8) provides detailed and comprehensive census characteristics of people, families and dwellings for small areas. This series is available for all standard census geographic areas, and is available in hardcopy and electronic formats.

The series comprises six community profiles:

- *Basic Community Profile (BCP)* contains 32 tables of detailed data covering dwelling, household and family topics. This profile is available for all standard census geographic areas, Commonwealth (CFD) and State Electoral Divisions (SED), Postal Areas, and Suburbs, for the States/Territories and Australia.
- *Time Series Community Profile* contains 21 tables of variables from the Basic Community Profile comparing data from the 1986, 1991 and 1996 Censuses where the classifications are comparable.
- *Usual Residents Profile* contains 25 tables based on the usual residents of SLAs. This is the only community profile based on place of usual residence.
- *Expanded Community Profile* contains 41 tables available for SLAs and larger areas, comprising more detailed versions of some of the basic profile tables, plus new tables.
- *Working Population Profile* contains 17 tables of labour force and related characteristics of people who work and are counted in SLAs within the journey to work (JTW) study areas — usually capital cities.
- *Summary Indigenous Profile* contains selected characteristics of Indigenous people in two tables which are available at the Indigenous Location level.
- *Detailed Indigenous Profile* contains selected characteristics of Indigenous people in 26 tables which are available for Indigenous Areas, ATSIC Regions, States and Territories.

CDATA96

CDATA96 (Cat. nos. 2019.0-8) is a CD-ROM product which provides a large volume of tabulated census data, digital boundaries and base map data. It includes software capable of producing tables, maps and graphs of the data.

KEYDATA

CENSUS KEYDATA (Cat. nos. 2023.0-8) is a CD-ROM product which provides access to 1996 Census Community Profiles and Classification Counts data and Digital Boundaries, using a specially encrypted CD-ROM.

Classification Counts

Classification Counts (Cat. nos. 2022.0-8) provides frequency counts for 1996 Census variables in complete classificatory detail, for every State and capital city.

Census Household Sample File

The *1996 Census Household Sample File* (Cat. no. 2913.0) provides a comprehensive unit record database of census characteristics, containing a sample of private households and associated persons, and persons in non-private dwellings.

Social Atlas Series

The *Social Atlas* (Cat. nos. 2840.1-8) publications feature colour maps of the key social, demographic and economic characteristics of each capital city.

APPENDIX — CENSUS PRODUCTS AND SERVICES *continued*

Australia in Profile — A Regional Analysis

Australia in Profile — A Regional Analysis (Cat. no. 2821.0) provides commentary and data on a number of key social indicators from the 1996 Census, with the focus on regional distributions and comparisons.

CONSULTANCY SERVICES

The following census specific services are available:

Thematic Profile Service

The *Thematic Profiles Service* (Cat. nos. 2021.0-8) provides profiles on request, covering the themes of the Family, Young People, Older People and Ethnicity, on a variety of media.

Customised Profile Service

The *Customised Profiles Service* provides community profile data tailored to your needs, on a variety of media.

Customised Tables Service

The *Customised Tables (Matrix) Service* provides detailed cross-classified tables tailored to your needs on a variety of media.

Customised Geographic Data Reports Service

The *Customised Geographic Data Reports Service* provides tabular geographic data which relate specifically to the census Geographic Areas and their characteristics (e.g. area).

Customised Mapping Service

Through the *Customised Mapping Service* you are able to purchase both Customised Thematic Maps and Customised Reference Maps on request.

GLOSSARY

General descriptions of terms and concepts used in this publication are provided below. Tables are also footnoted where applicable for additional clarity. Detailed definitions of classifications and concepts are available in the *1996 Census Dictionary* (Cat. no. 2901.0).

Dwelling A dwelling is a building or structure in which people live. This can be a building, such as a house; part of a building, such as a flat; or it can be a caravan or tent, humpy or park bench. Houses under construction, derelict houses, vacant tents, or converted garages, are not counted in the census.

There are private and non-private dwellings.

A private dwelling is normally a house, flat, part of a house, or even a room; but can also be a house attached to, or rooms above, shops or offices; an occupied caravan or unit in a caravan park or craft in a marina; occupied dwelling in a Manufactured Home Estate; occupied self-care unit in Accommodation for the Retired or Aged; a houseboat; or tent if it is standing on its own block of land. An occupied caravan situated on a residential allotment is also classed as a private dwelling. Private dwellings can be either occupied or unoccupied.

Non-private dwellings are those dwellings not included above, which provide a communal or transitory type of accommodation. These dwellings include hotels, motels, guest houses, prisons, religious and charitable institutions, defence establishments, hospitals and other communal dwellings. Only occupied non-private dwellings are included in the census.

Geographic areas The tables in this publication are at the levels of Statistical Subdivision and Statistical Division, as defined by the 1996 Census edition of the Australian Standard Geographical Classification (ASGC).

Statistical Subdivision (SSD): These areas consist of one or more SLAs and cover, in aggregate, the whole of Australia without gaps or overlaps.

Statistical Division (SD): These areas consist of one or more SSDs and cover, in aggregate, the whole of Australia without gaps or overlaps. They do not cross State or Territory boundaries. However, the Other Territories, Jervis Bay Territory and the Territories of Christmas Island and Cocos (Keeling) Islands together form one SD. Capital city SDs are predominantly urban in character and the boundaries are delineated to contain the anticipated urban development of the capital cities (and associated urban centres) for a period of at least 20 years.

SDs outside the capital city are designed to be relatively homogeneous regions characterised by identifiable social and economic links between the inhabitants and the economic units in the region, under the unifying influence of one or more major towns or cities.

State/Territory (STE): States and Territories consist of one or more SDs and are the largest type of spatial unit in the ASGC. The six Australian States and five Territories which are part of geographic Australia and included in the 1996 ASGC are New South Wales, Victoria, Queensland, South Australia, Western Australia, Tasmania, Northern Territory, Australian Capital Territory, Jervis Bay Territory and the external Territories of Christmas Island and Cocos (Keeling) Islands. In the ASGC, Jervis Bay Territory, the Territory of Christmas Island and the Territory of Cocos (Keeling) Islands are combined to form Other Territories (OT).

GLOSSARY *continued*

Geographic areas *continued*

Codes for State/Territory are as follows:

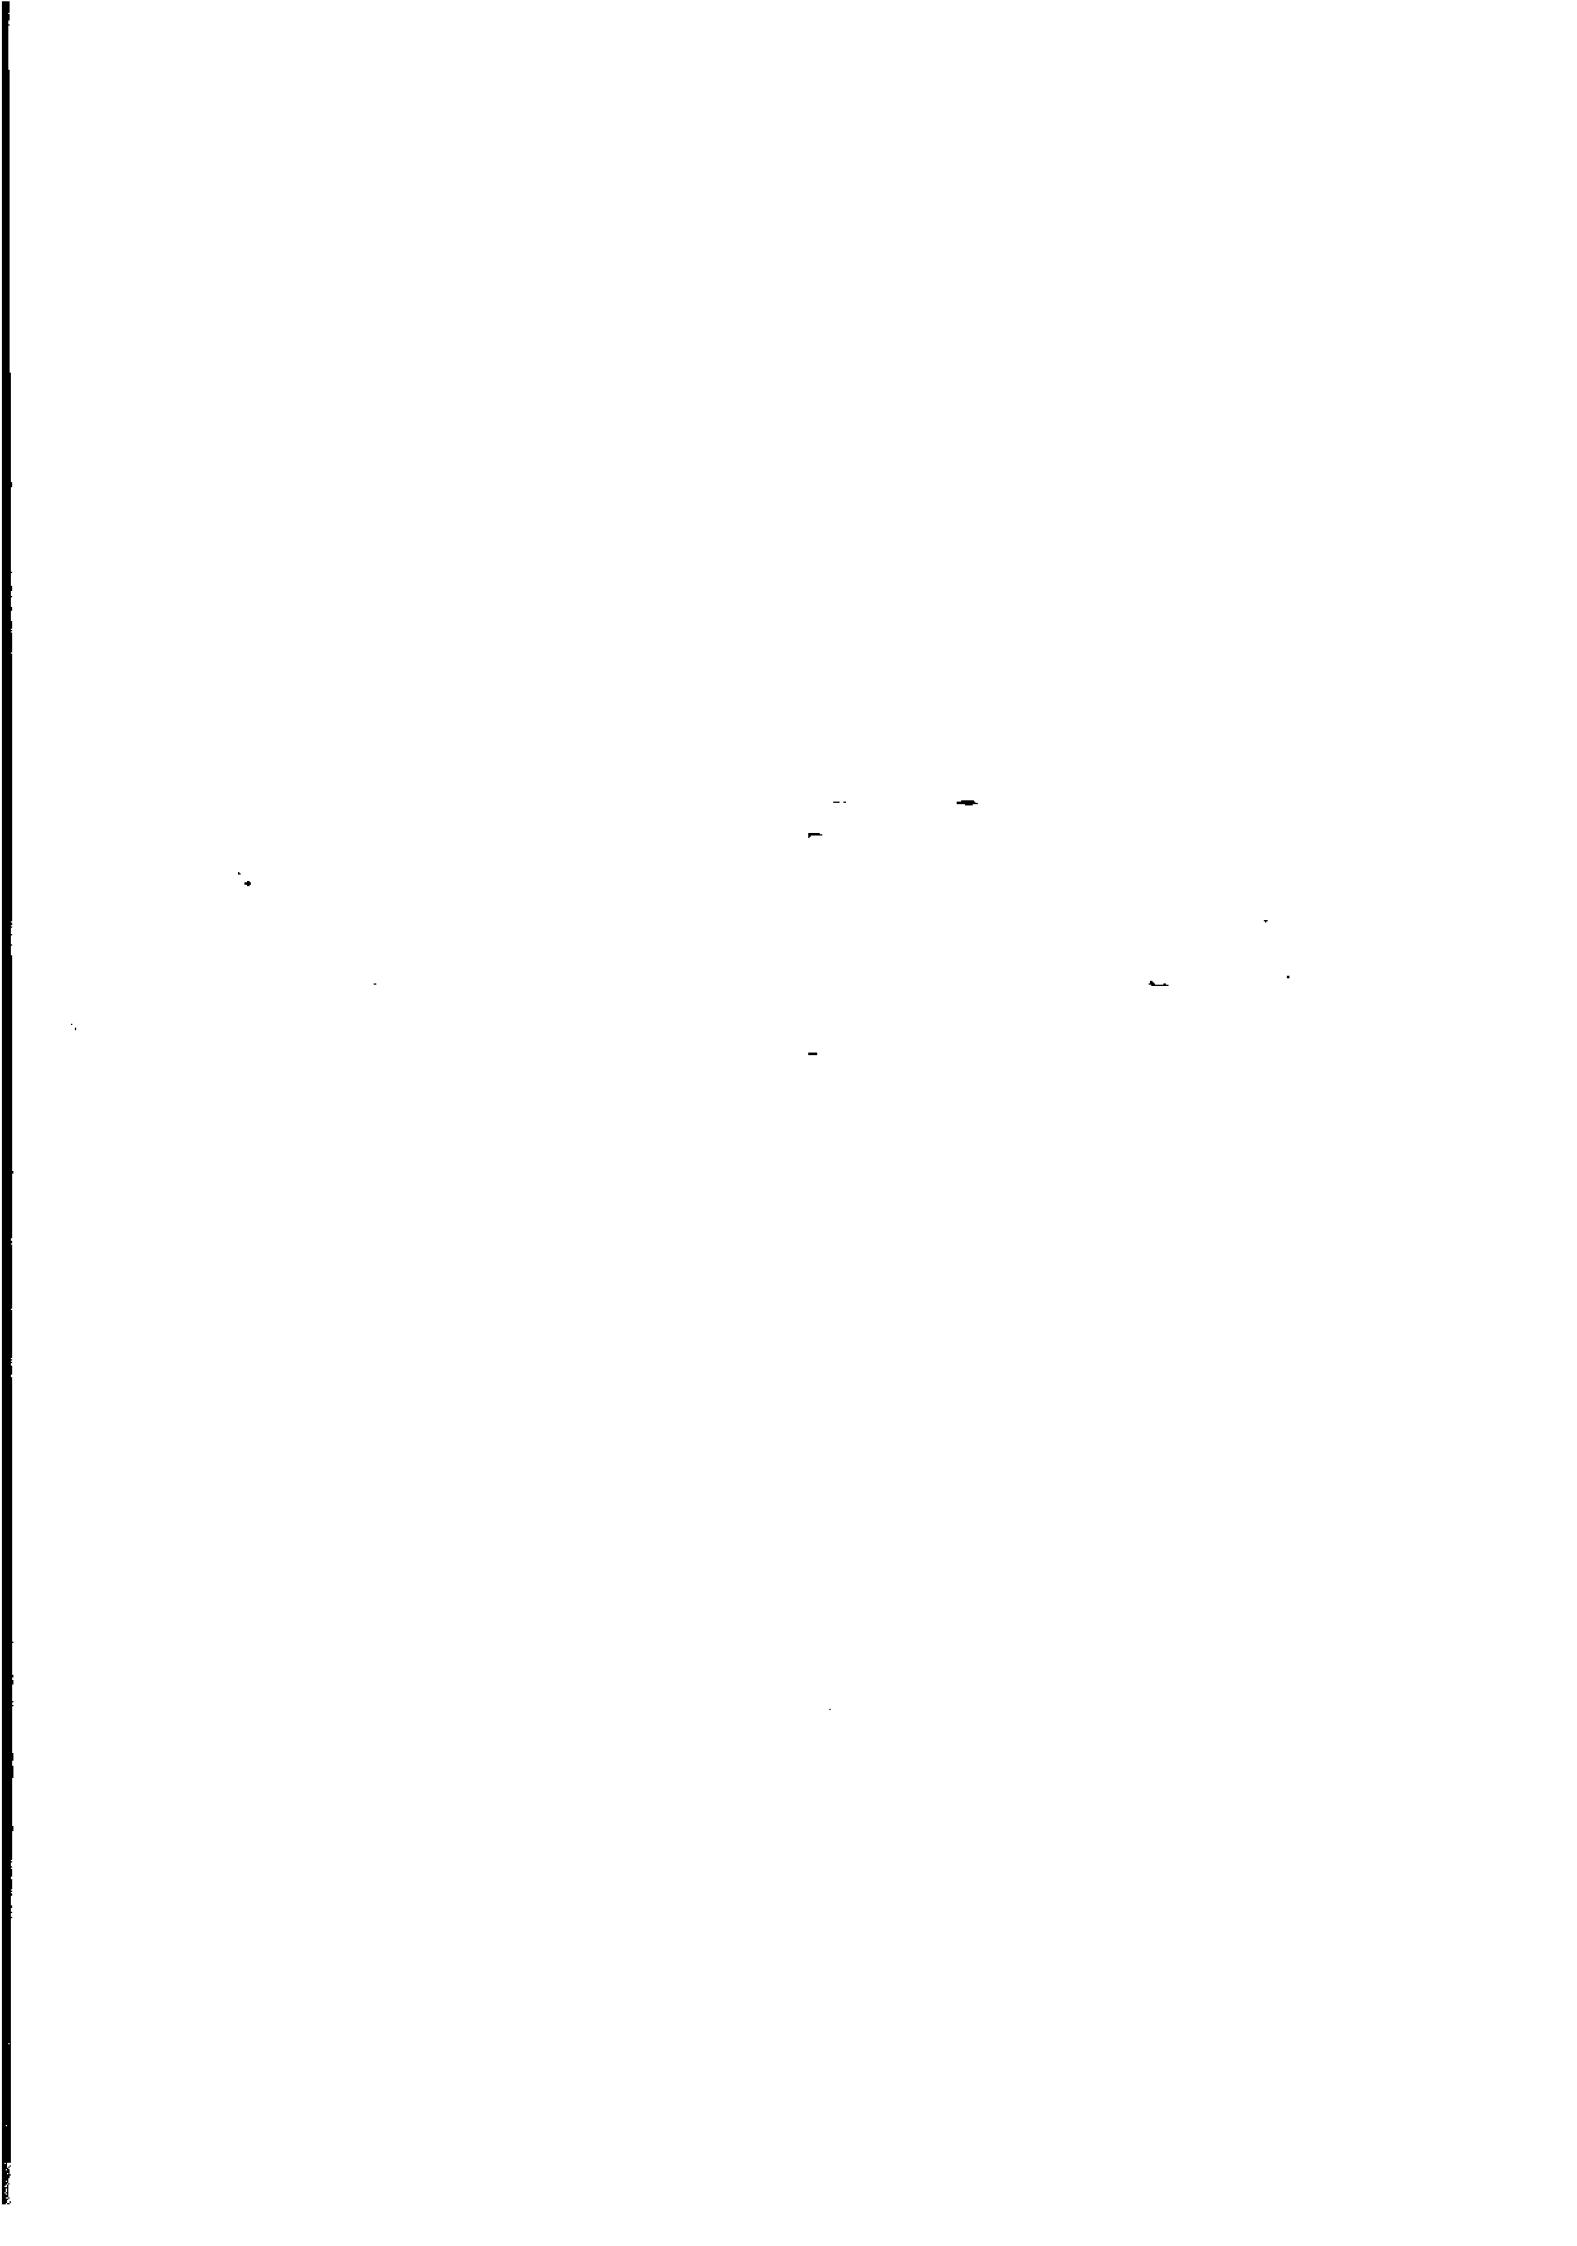

- 1 – New South Wales
- 2 – Victoria
- 3 – Queensland
- 4 – South Australia
- 5 – Western Australia
- 6 – Tasmania
- 7 – Northern Territory
- 8 – Australian Capital Territory
- 9 – Other Territories

More information about definitions, and lists of codes and names of the geographic areas can be found in *Volume 1: Australian Standard Geographical Classification (ASGC)* (Cat. no. 1216.0) effective date 1 July 1996.

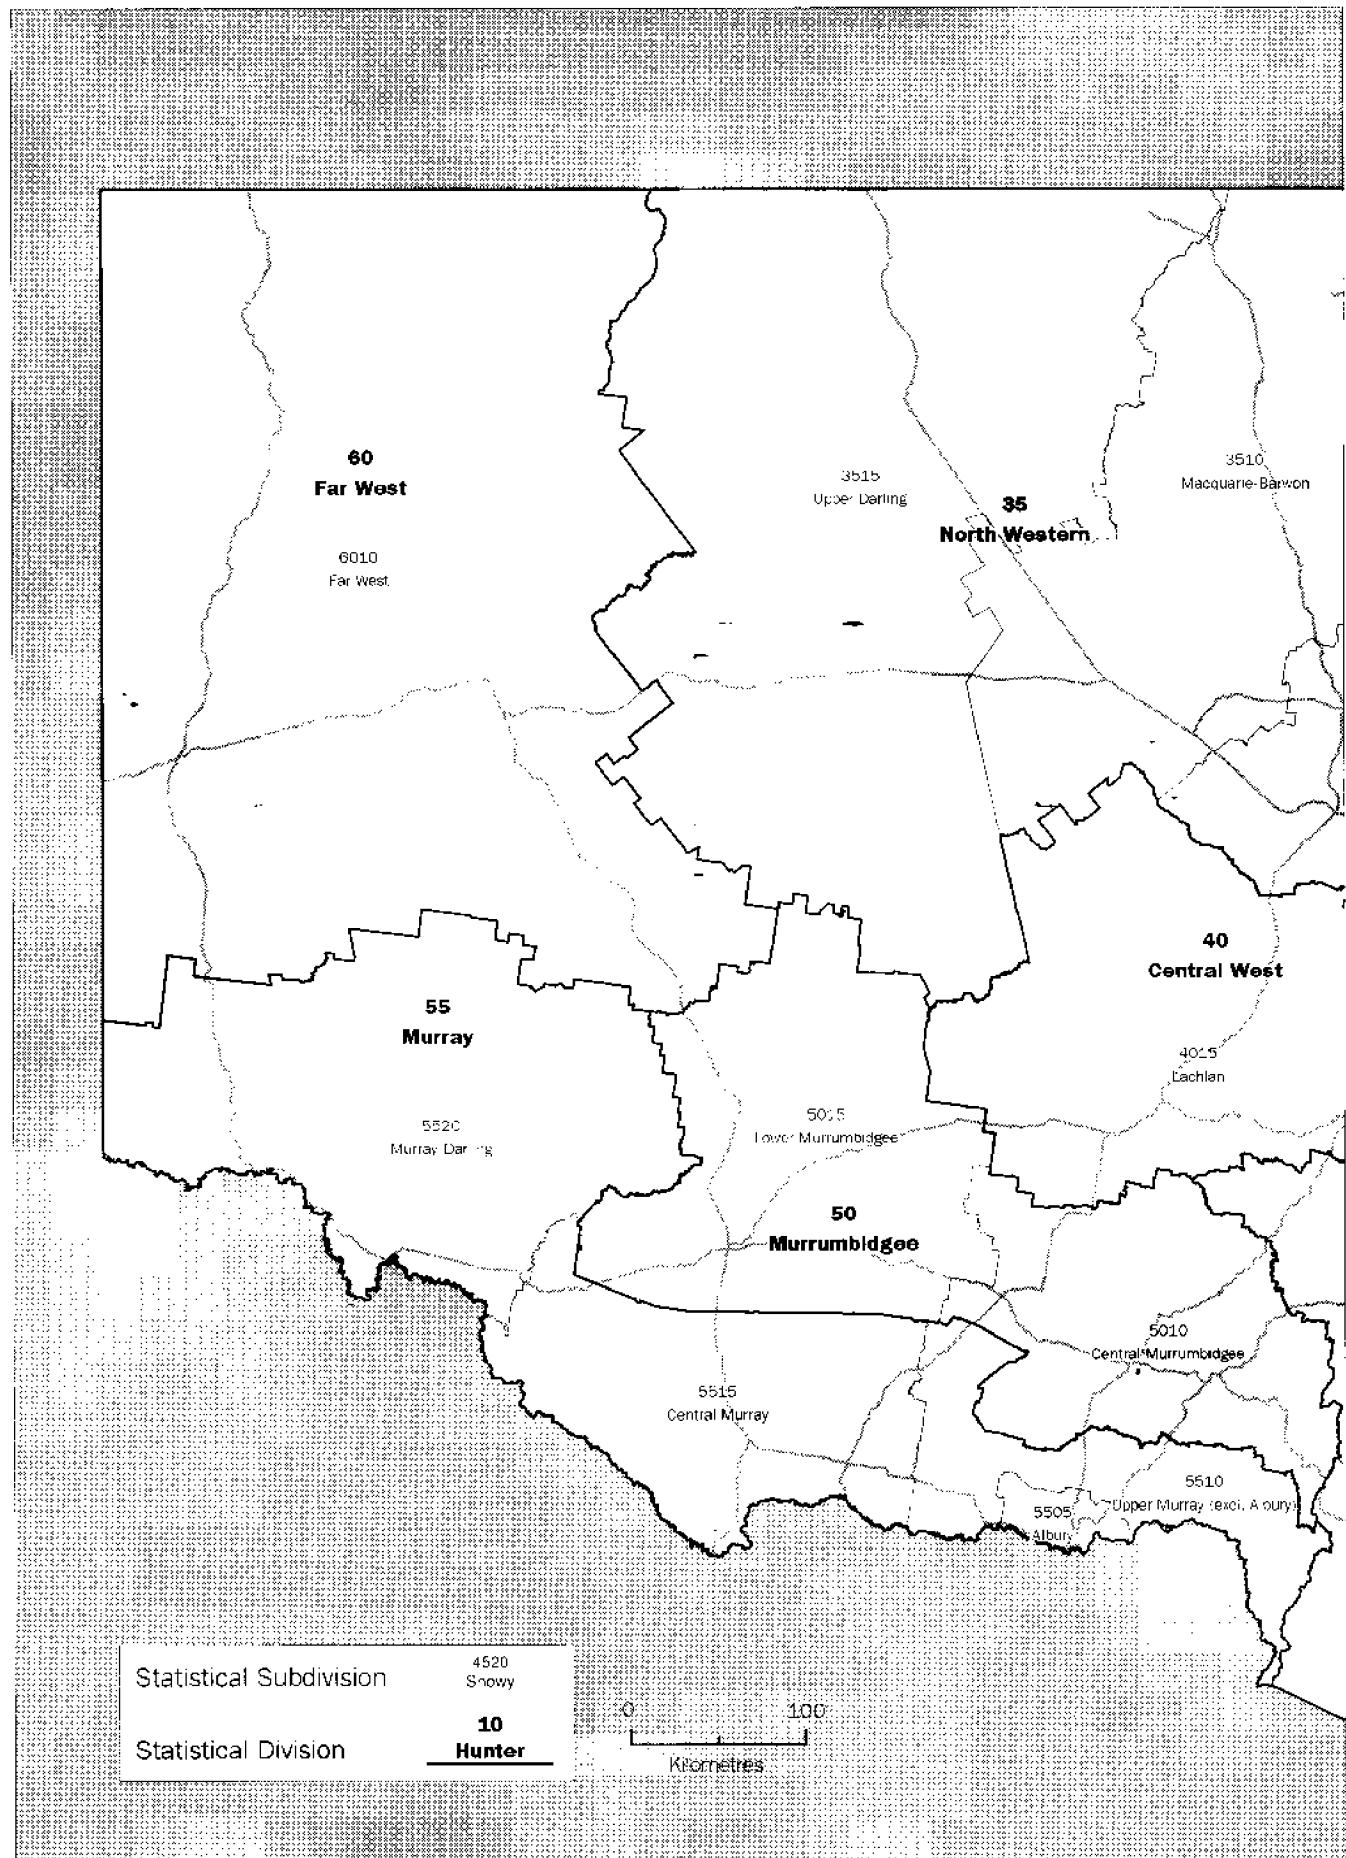

Income People aged 15 years or more are asked to state their usual gross weekly income, which is the income before tax, superannuation, health insurance, or other deductions are made. Gross income includes family allowance, family allowance supplement, pensions, unemployment benefits, student allowances, maintenance (child support), superannuation, wages, salary, overtime, dividends, rents received, interest received, business or farm income (less operation expenses) and worker's compensation received.

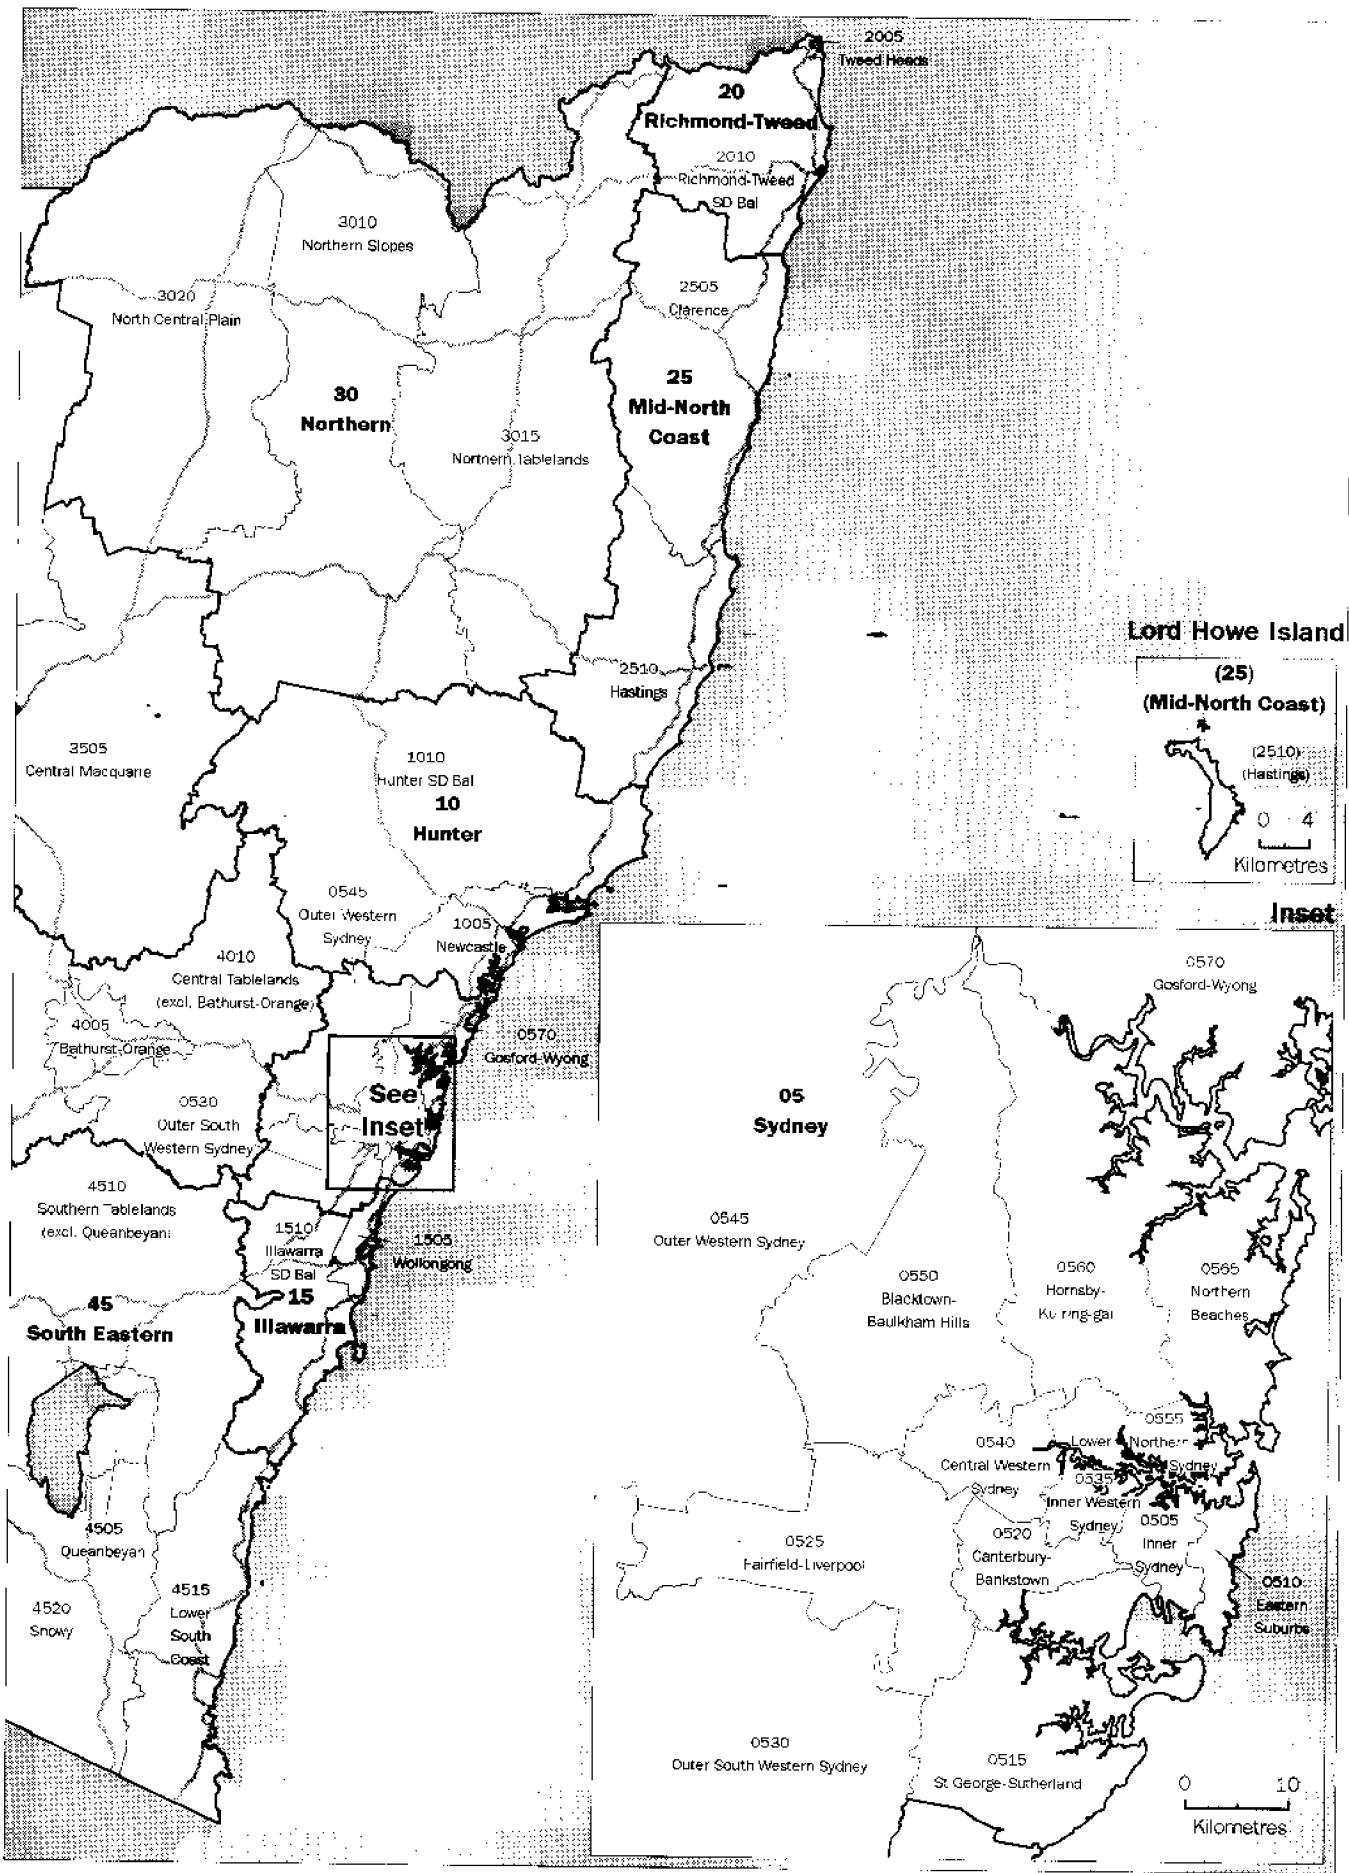

Indigenous A person is defined to be of Indigenous origin if he or she identifies himself or herself as of Aboriginal and/or Torres Strait Islander origin.

Overseas-born Overseas-born people are those who state that they were born in a country other than Australia, those born at sea, and those whose responses are classed as 'Inadequately described' or 'Not elsewhere classified'.
